PROFILE

Computer Science graduate with hands-on experience in software development and artificial intelligence. Built full-stack applications and machine learning systems, including computer vision and information retrieval pipelines, with experience integrating AI models into applications. Seeking an entry-level Software Engineer or AI Engineer role.

EDUCATION

Universitas Indonesia

2022 - 2026

Bachelor of Computer Science

GPA: 3.53/4.00

Related coursework: Data Mining, Deep Learning, Intro to AI & Data Science, Statistics & Probability, Linear Algebra.

PROFESSIONAL EXPERIENCE

Growth Data Support Intern - PT Vidio dot com

Aug - Dec 2025

Data Analysis, SQL, Data Science, Problem Solving

- Conducted ad hoc data analyses on large-scale production data to support strategic decision-making and identify actionable insights.
- Wrote and optimized complex SQL queries to extract, transform, and analyze data from production databases.
- Collaborated on exploratory data analysis and experimentation for a customer churn prediction initiative.

PROJECTS

IsyaratKu - Indonesian Sign Language (BISINDO) Learning App

Final Project, 2026

Computer Vision, Deep Learning, User-Centered Design, MediaPipe

- Conducted user research and translated findings into application requirements using a user-centered design approach.
- Developed computer vision models for real-time BISINDO recognition, covering static alphabet gestures and temporal word-level gestures using MediaPipe landmarks and machine learning models.
- Optimized and deployed trained models for client-side inference and integrated them into a web-based learning application with real-time webcam feedback.

Two-Stage Document Retrieval and Reranking

Information Retrieval Project, 2026

Python, FAISS, Sentence Transformers, BERT, NLP

- Developed a two-stage document retrieval pipeline using dense vector search with FAISS to retrieve the top 100 candidate documents.
- Implemented a BERT-based reranking stage to rerank retrieved candidates and return the top 10 most relevant documents.
- Improved retrieval performance compared with a single-stage BM25 baseline by 2.85x, optimizing the system using NDCG as the primary evaluation metric.

Biomedical Organ Classification

Deep Learning Course, 2025

Python, PyTorch, Image Classification

- Preprocessed 61,000+ CT-scan images with augmentation and trained a deep-learning classifier from scratch; evaluated on 46,000+ unseen samples and achieved an F1-score of 0.901.

Deposit Product Subscription Prediction

Data Science Indonesia Competition, 2024

Python, scikit-learn, Ensemble Learning

- Collaborated in a three-person team on preprocessing, exploratory analysis, feature engineering, and model tuning; achieved 0.7897 AUC using models including stacking ensembles.

Online Thrift Store - Web Application

Advanced Programming Course, 2024

Spring Boot, PostgreSQL, React, Java

- Collaborated on an online thrift-store application for an Advanced Programming course using Spring Boot, PostgreSQL, and React.

- Focused on software architecture, quality, and design principles while contributing to the full-stack application and RESTful API stack.

SKILLS

Programming	Python, Java, SQL, JavaScript, TypeScript
AI & Machine Learning	PyTorch, scikit-learn, pandas, NumPy, MediaPipe, FAISS, Sentence Transformers, Computer Vision, Information Retrieval, NLP, Data Analysis
Software Development	React, Spring Boot, Django, REST APIs, PostgreSQL
Tools	Git/GitHub, Jupyter Notebook, Google Colab

LANGUAGES

English - Fluent	Bahasa Indonesia - Native
------------------	---------------------------
